

Horticulture Research, co-published by Nature Publishing Group (NPG) and Nanjing Agricultural University. It is an Open Access, fully peer-reviewed journal that publishes the best and most interesting research focusing on all major horticultural crops from around the world. Now, *Horticulture Research* is indexed in SCIE, ESCI, PubMed Central and DOAJ.

Original research articles will be published in the following headings

- Genetics, breeding and germplasm
- Biotechnology and genetic engineering
- Genomics, proteomics and evolution
- Whole plant physiology and source/sink relation
- Cellular and molecular developmental biology
- Biochemistry, metabolome and product quality
- Interactions with environments and other biological organism

Benefits to Authors

- Open access-anyone can download and read your paper
- Wide exposure to a large global audience on nature.com
- Quality peer-review and fast publication
- Research summaries that maximize the reach of your work
- Internationally renowned editor and editorial board
- Discoverable in PubMed and Web of Science

Editorial

Cheng, Z.-M. and D. J. Werner (2015). **Will the traditional horticultural breeding and genetics research be fairly valued in academia?** *Horticulture Research* 2: 15053. DOI: 10.1038/hortres.2015.53
